About Me

I've had an interest in computers for as long as I can remember. As an adolescent, I began experimenting with programming, with that interest growing exponentially during my first university level computer science course. After determining that I wanted to make a career out of software development, I decided to enroll at the Nashville Software School to truly commit to my passion for technological work.

Projects

- Solo Projects
  - ClimbTogether: Front End Capstone designed to showcase my knowledge of HTML/CSS/ReactJS. ClimbTogether is a website dedicated to helping League of Legends players find other players to play with to improve their competitive experience.
- Group Projects
  - Celebrity Tribute: Website dedicated to Robin Williams. Personally responsible for website styling and Career section.
  - Welcome to Nashville: Nashville based itinerary planner. Personally responsible for Restaurant portion and use of OpenTable API.
  - Nutshell: Mock Social Media website using vanilla JavaScript. Personally responsible for styling and to-do functionality.
